

THE IMPACT COLLEGE  
**Financial Analyst Program**

**Crafting Your Impact in Finance**

## Welcome to The Impact College (TIC)

At The Impact College (TIC), we are passionate about empowering individuals in finance. Through project-based learning, we help students and early professionals build the skills they need to thrive in the dynamic financial industry. Our Financial Analyst Program is designed to provide real-world experience, hands-on training, and access to expert mentorship. Join us and craft your impact in the finance sector!

The program really gave me the foundation I need for finance. As an engineer, I now understand how to break down financial statements, value companies, and research markets. These are skills I can use in any role I take in the future. More than that, it taught me how to think critically and make decisions based on numbers and data. I feel much more confident stepping into the finance world now.

- Nnaji Uchenna David, Covenant University

# Why Choose the Financial Analyst Program?

This program offers a transformative experience, equipping you with the skills and confidence to achieve your goals.

## Hands-On Learning

Gain practical skills through real-world projects.

## Mentorship

Receive personalized guidance from global finance leaders.

## Career Focus

Build a professional brand and prepare for global opportunities.

Whether you're starting or advancing your career, this program is your gateway to success in the financial industry.

## Build Your Foundation

### Microsoft Office Tools

- Master Excel for financial modeling and analysis, along with Word and PowerPoint for documentation and presentations.

### Basic Accounting

- Learn fundamental accounting principles, analyze financial statements, and understand key concepts like the accounting equation.

### Art of Clear and Engaging Presentations

- Develop the skills to create impactful presentations that communicate complex ideas effectively.

# Master Financial Analysis

## Mastering Market Research

- Explore tools and techniques for conducting thorough market research and staying updated with financial trends.

## Financial Modelling & Valuation

- Build robust financial models, evaluate investment opportunities, and analyze case studies from both corporate and startup environments.

## Real-World Application: Capstone Project

Put your learning into action with an equity research report. Analyze a company's financials, forecast its performance, and make investment recommendations. Present your findings to a panel of experts and receive valuable feedback.

### Key Deliverables

- Company analysis and revenue breakdown.
- Financial forecasts and risk assessment.
- Buy, hold, or sell recommendations.

## Learn from Experts, Guided by Mentors

Each participant is paired with a mentor from renowned organizations like the World Bank, Bloomberg, and Bank of America. Our faculty includes professionals from institutions such as EY, Deloitte, and Harvard Business School, ensuring you receive world-class education and insights.

### Some of Our Mentors

**Boluwatife Omolade**

Bloomberg

**Lukman Yusuf**

International Monetary Fund  
(IMF)

**Sope Okunowo**

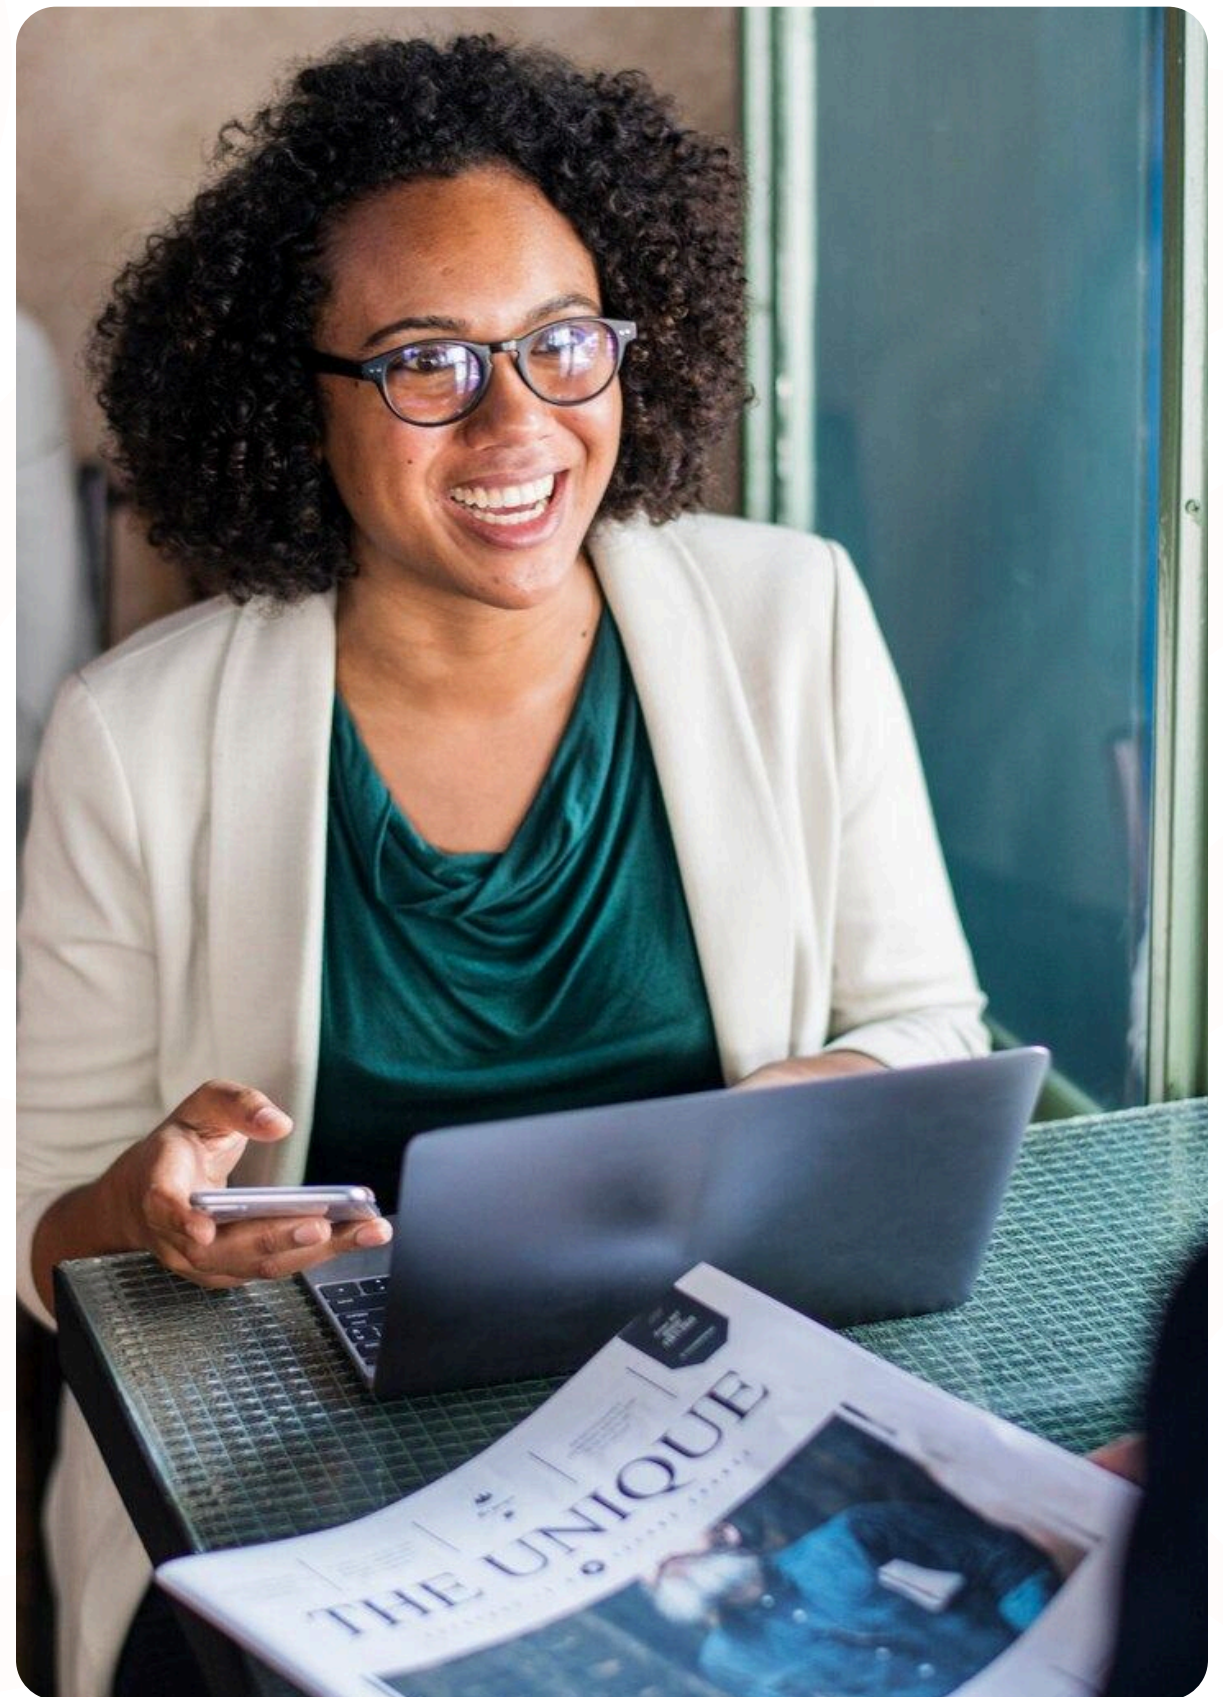

Bank of America

## Prepare for Your Global Career

Our Career Development Week is designed to position you for success:

- Optimize your CV and LinkedIn profile.
- Prepare for interviews with global companies.
- Network with professionals from top firms like World Bank, Bloomberg and Bank of America.

## What Our Graduates Say

Hear from our alumni:

“

The Financial Analyst Program exposed me to the technical nature of finance and what I need to do to stand out. I enjoyed the weekly sessions with my mentor and found the financial modeling class especially valuable. Learning with people in the positions I want to be in made this a great opportunity.

**- Yekinni Otolorin Elizabeth, Bowen University**

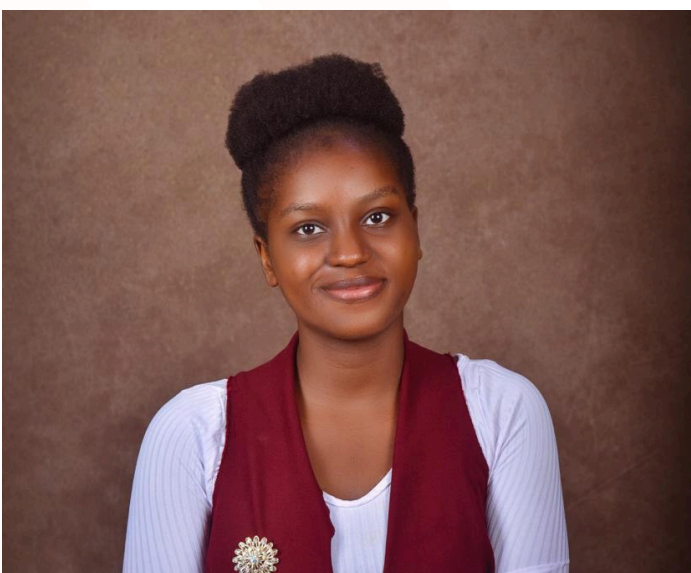

“

The soft skills part is awesome, considering the fact that it is what is required in today's competitive labour market to gain a competitive edge. Similarly, the technical part of the course is very relevant, which I think was designed for students like me who have a zero academic background in Accounting or Finance.

**- Jamilu Samaila, Audencia Business School, France**

“

What I enjoyed most was the mentorship, Capstone project and the assignments. It was really nice working with great minds for our team project. I got an amazing mentor who I learnt a lot from during the mentorship and the assignments really widened my knowledge to things I didn't know before.

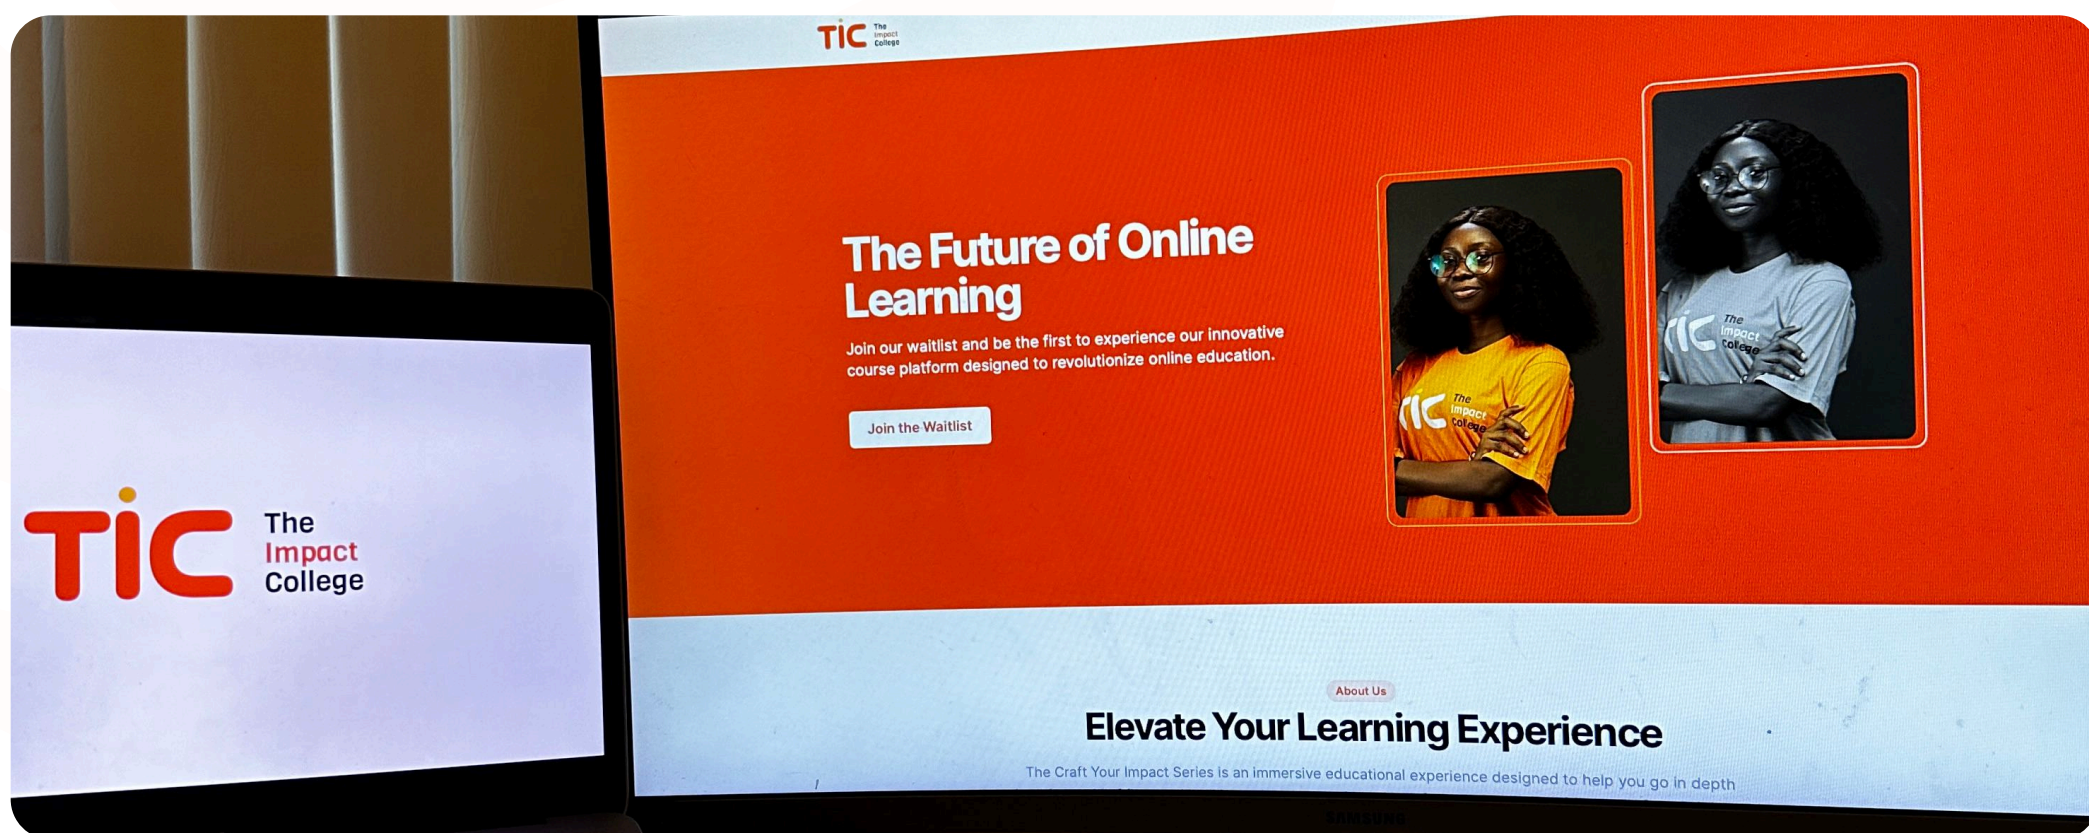

**- Adebukola Salami, University of Ibadan**
